

Traffic Injury Prevention

Instructions for Authors:

Traffic Injury Prevention is an archival journal covering traffic safety, crash prevention, and injury control, including alcohol and drug impairment, behavior of traffic participants, injury mechanisms, impact biomechanics, injury prevention, and epidemiology. Published articles have been subjected to anonymous and independent peer review. They can include all phases of experimental, computational, statistical, emergency, clinical, and epidemiological research.

Submission of Manuscripts

The Editor encourages electronic submission of articles. Submit papers to the World Congress on Neck Pain using the login Web-Portal <http://www.neckpaincongress.org/Login/>

Preparation of Manuscripts

Manuscripts should contain the following sections in this order: title, author(s) names and affiliation(s), complete mailing and e-mail address(es), abstract, key words for Medline, introduction, methods, results, discussion, acknowledgments, and references. Section numbers should not be used. Notations should be defined as they are introduced. The text should be double-spaced with 1-inch margins using Arial 10-point font. The manuscript should consist of text with the tables and figures at the end. Number the pages, and avoid the use of footnotes.

Language: English only.

Abstract: A 200 to 400 word structured statement using the following headings: Objective, Methods, Results, and Conclusions.

Key Words: Include up to six key words for indexing and database word searches.

Text Headings: Set first-level headings in the text to the left, typed in all capitals and bold faced; begin text on the following line. Second-level headings should be typed in bold lowercase letters, but with all main words capitalized; start text on the next line. For third-level headings, use bold type and capitalize only the first word; begin text on the same line after three spaces.

FIRST-LEVEL TEXT HEADINGS

Second-Level Text Headings

Third-level headings: With text run on

References

Compile references at the end of the text after the acknowledgments if any. References should be unnumbered and listed in alphabetical order. All sources cited in the text must be included in the references list, and vice versa. References should be cited in the text by giving the last name of the author(s) and the year of publication in parentheses. Example: Brown and Green (1985) show that.... With three or more authors, use the form Brown et al. (1985). Always give inclusive page numbers for references to journal articles and a page range or chapter number for books. The Journal discourages the use of Website references. The following are examples of entries for a journal, proceeding, report, book, Ph.D. thesis, and paper in an edited book:

Burger HM, Cars RT. (1997) Parameters for Modeling the Upper Arm, *J. Biomechanics*, Vol. 30, pp. 1647–1652.

Feltner ME. (1994) Kinetics of the Throwing Arm Segments During a Penalty Throw in Water Polo, *Proc. 134th Annual AAAM*, pp. 58–72.

Jano SL. (1998) Foam Use to Optimize Bicycle Helmets for Children, for the Foam Rubber Society, Rydal, PA.

Yamada H. (1970) Strength of Biological Materials, Williams and Wilkins Co., Baltimore, MD.

Nathanson J. (1997) Constitutive Equations for Brain Modeling, Ph.D. dissertation, University of Maryland, College Park, MD.

Melvin J, Evans PG. (1992) The Biomechanics of Trauma, in *Biomechanics Studies*, Ed. M. Nahum, T. Hughes, Appleton-Century-Crofts, Norwalk, pp. 78–97.

Equations

Mathematical equations should be numbered using Arabic numerals enclosed in parentheses on the right-hand margin. They should be cited in the text as Eq. (10), or Eqs. (12)–(16).

Units

Manuscripts submitted for publication must use SI units. English units may be included in parentheses.

Tables and Figures

Tables and figures should be included at the end of the text using Arial font. A short descriptive title should appear above each table with a clear legend and any footnotes suitably identified below. All units must be included. Figures should be labeled, taking into account necessary size reduction as many figures are included in one-column width format. Captions should be typed under each figure.

Illustrations

Illustrations (line drawings, halftones, photos, photomicrographs, etc.) should be clean originals in digital form with 300 dpi or better resolution. A PowerPoint file with the figures will be required for accepted papers. The editor may modify the figures for consistency in the Journal, and the publisher has the right to refuse publication of any artwork deemed unacceptable.

Proofs

Online proofing of typeset papers is arranged with the corresponding author. Proofs should be checked carefully and revised within 48 hours. Corrections are limited to printer errors and clarifications; no substantial rewrites can be made without the editor's approval.

Reprints

Each author of an article will receive a complete copy of the issue in which the article appears, up to a total of 3 copies per article. The corresponding author is responsible for distribution of copies to co-authors. Reprints of an individual article may be ordered from Taylor & Francis by using the reprint order form included with page proofs.
